Office Action Summary

Application No.

10/785,516

Applicant(s)

GILLESPIE ET AL.

Examiner

Kimberly T. Wood

Art Unit

3632

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 3632

This is an office action for serial number 10/785,516.

Election/Restrictions

Applicant's election without traverse of Species II drawn to figures 8-13 in the reply filed on January 9, 2006 is acknowledged.

None of the claims have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on January 9, 2006.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-11, 14-16, and 18-20 are rejected under 35 U.S.C. 102(b) as anticipated by Li 5,799,917 or, in the alternative, under 35 U.S.C. 103(a) as obvious over Li in view

Art Unit: 3632

of Huang 6,478,275. Li discloses a mounting bracket (11 and 24) including a lateral surface and a region between the lateral surface and planar surface, mounting bracket plate (26), tilt block (17), mounting arm (13, 21, 22, and 12), an adapter (27), a cover piece (14), means for sliding (see figures 3 and 5) being elongate tracks on the mounting arm (12) and adapter arm on adapter.

Li discloses all of the limitations of the claimed invention except for the tilt block rotatably coupled to the mounting bracket. Huang teaches that it is known to have a tilt block (10) rotatably (12) coupled to the mounting bracket (13). It would have been obvious to one having ordinary skill in the art at the time of the invention to have modified Li to have included the swivel means as taught by Huang to allow the tilt block to be rotatably coupled to the mounting bracket for the purpose of allowing the supporting device 360 degrees of freedom along a planar surface.

Claim 6, 7, 12, 13, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Li 5,799,917 in view of Huang

Art Unit: 3632

6,478,275. Li discloses all of the limitations of the claimed invention except for the plurality of bearing including a first and a second bearing system. The examiner takes official notice that it is well known in the art to provide a swivel means being a plurality of bearings including a first needle bearing system and a second needle bearing system. It would have been obvious to one having ordinary skill in the art at the time of the invention to have modified Li in view of Huang to have made the swivel means a plurality of bearings including a first needle bearing system and a second needle bearing system instead of a pivot spindle because these two mechanisms were art-recognized equivalents at the time the invention was made, one of ordinary skill in the art would have found it obvious to substitute a pivot spindle for plurality of bearings including a first bearing system and a second bearing system.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art teaches conventional systems for mounding device from an underside of a body.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly
